Diminutive Coin

Whitepaper
Table of contents

1. History/Introduction

Diminutive coin, or DIMI in short is a tiny or minuscule numismatic community coin, designed to hold value due to its limited emission and scarcity.

Diminutive Coin was created in 2020. with a goal to be used as vaulting coin for exchange in development. That goal went into oblivion when previous DIMI developer decided to abandon the project and dumped premine coins that were in his possesion. Since then, we (current team) are trying to bring DIMI where it belongs - to the very top in crypto scale.

Factors have been accounted for being of such a small value ever to be produced, such as reduction of coin transfer fees and implementation of a Proof Of Work (POW) & Proof Of Stake (POS) consensus mechanism to produce block reward of 0.01 DIMI or 0.04 DIMI for POW, and 0.01 DIMI or 0.00001 DIMI for POS (from the blockchain startup date 'till respective reward halving dates).

2. Algorithm

The HMQ1725 cryptographic algorithm stands for "Highly Modifies Quark1725". It represents 17 combined algorithms with 25 hashing rounds. In order to provide highest level of security it uses 17 algorithms, which are hashed 25 times. This algorithm is easy to compute on low-to-medium powered computers, which means it is both CPU and GPU minable. HMQ1725 is not highly ASIC resistant, but at the time of "DiminutiveCoin" creation there were no signs of ASIC or FPGA miners available for HMQ1725 algorithm. Before such miners come into play – there is a good chance to mine "DiminutiveCoin" using CPU and GPU.

3. Technical Details

Official name:_____DiminutiveCoin
Coin Ticker:_____DIMI
Coin Type:_____POW/POS
Algorithm:_____HMQ1725
Block Time:_____75 sec.
Drift Time:_____10 min.
Address Starting Letters:_____D / E
Default P2P Port:_____49139
Default PRC Port:_____49122
Minimum Stake confirms:_____75 blocks
Minimum Stake Age:_____2 Hours
Difficulty Retarget:_____750 sec.
Coinbase Mining Maturity:_____75 blocks
Coinbase Wallet send Maturity:_10 blocks
Min. Tx Fee:_____0.0000025 DIMI
Premine:_____5% (DUMPED by original developer)
Maximum Coin Supply:_____200000 DIMI

4. Block Rewards

POW

Even Block:_____0.04 DIMI
Odd Block: _____0.01 DIMI
Halving:_____Every 500000 blocks

POS

Even Block:_____0.00001 DIMI
Odd Bllock:_____0.01 DIMI
Halving:_____Every 1000000 blocks

5. Price

The actual price (at the moment) for one DIMI is $1.90, and it will only increase as time goes by — meaning each second you stay away from this hidden gem, the more Dimi gains its value. Diminutive coin is currently listed at four exchanges and searching for more to be traded at. Diminutive Coin has been on the market for 3 years and its trading power has got the market's attention.

So, if you are looking for something substantial or with a history of success, then Diminutive Coin is your best choice.

6. Store

Diminutive Coin has its own online store of digital keys with payment in cryptocurrency DIMI. Its your non-stop source for digital game keys with instant downloads and 24/7/365 delivery. Enjoy exclusive, premium deals on Xbox, Steam, Origin, PlayStation game keys, gift cards, prepaid cards and softwares at our digital marketplace. Daily updated list of Steam CD-Keys for all of your favorite games. Don't worry about overpaying or subscriptions – ever again. Get the best digital product offers at the lowest prices, guaranteed.

Be sure to read all the information before ordering: availability, description, platform, region, and activation method.
You can also find out the preliminary price in DIMI, using the using the currency converter.

Visit our online webstore at - https://store.diminutivecoin.com

7. Exchanges

DIMI is available for trading on a growing number of exchanges, with multiple cryptocurrency pairs currently available.

[Freiexchange](https://freiexchange.com/market/DIMI/BTC)
is the main exchange platform, Xeggex Exchange
(https://xeggex.com/market/DIMI_BTC)
offers multiple cryptocurrency pairs such as

DIMI/USDT (https://xeggex.com/market/DIMI_USDT), while on FreiXLite there is also a LTC pair - https://freixlite.com/market/DIMI/LTC.
Last, but not the least - AtomicDex Exchange where you can swap coins on this state of the art multiwallet - https://atomicdex.io/en/mobile or visit their official website at this link - https://app.atomicdex.io.

8. Use Case

As hard as it was to accept for the Support Team behind "DiminutiveCoin", that it's creator decided to abandon his project, we all came to agreement to stay true to it and carry on. As the former Use Case is no longer applicable to current situation, Support team is in the works of gathering required information for a future possibilities and uses, which ultimately can lead back to original idea and that is using DIMI as a vaulting coin at our own exchange.

Currently "DiminutiveCoin", as most cryptocurrencies, is used for:

1) Mining/HODL/Staking,

2) Speculative trading,

3) As a payment currency for Real-world Goods sold at Online stores/shops.

Diminutive Coin has found its way to the physical market in selected online stores and shops, and it is being recognized as a digital means of payment in such.

9. The Team

To begin with - Diminutive Coin team members are not famous people in crypto, no famous names in this project. Majority of the Diminutive Coin team members is not located in one country but rather on a continent (Europe) and Russia – we are scattered over Europe and northern Asia.

We mainly work on discord (https://discord.gg/DvD7CC48TD) and you can find us there. Our main developer goes by the name MadCatMining and he is also running a Diminutive Coin mining pool (https://mcmpool.eu/) that has a discord server as well (https://discord.gg/KKYjHGFqdK). Besides our main

There are 3 moderators/co-founders – RU, Petasplit and FCKers Club. Moderators job is to advise developer on how to proceed with the project as well as maintaining the server with new changes, updates and everything that is being done. MadCatMining as a lead developer maintains the code, updates wallet and keeps Diminutive Coin mining pool running.

There is also a co-developer named CryptoCoderz, who helps our main developer in achieving a better and advanced code quality and maintenance and has a special position in Diminutive Coin team for which we thank him greatly.

Next in line are Grzes and Suiseiseki. Grzes is Diminutive Coin community-manager who creates, grows and manages the the server. He acts as the voice and tone through community support, content distribution and digital engagement to build Diminutive Coin presence and trust.

Suiseiseki is a Diminutive Coin visual artist who creates stunning and appealing artworks which has been used at the website, store, instagram, you name it.
Her graphic design for Diminutive Coin in one word is amazing.

10. EWMCI

Diminutive Coin has partnered with EAST-WEST MAGNATE CRYPTO EXPERTS. EWMCI provides membership services to interested coin projects. This is facilitated via their EWMCI Leadership Alliance with active support provided in the following areas:
Blockchain explorers, data sevice listing, exchange listing, fiat-to-crypto bridges, mining pool inclusion, newsletter service.

Plus general advocacy on behalf of participating projects!
EWMCI team has years of experience in the cryptocurrency space.
If you are interested in cryptocurrency education and promotion feel free to visit their official website - https://ewmci.info.

11. NFTs

Diminutive Coin has integrated with UUNIGATE - Fractal Multi-chain Platform Gateway and DIMI is taking the next step in its evolution by offering NFTs on its blockchain.

UUNIGATE is a unique solution that brings altcoins/blockchain technologies and their communities together in an almost native layer solution. This means that users no longer have to deal with the convoluted processes that are typically required for simple data transfers across different networks and chains.
With UUNIGATE, it's all seamless.

With the UUNIGATE bot for Discord, users can easily create, send, manage, vote for, mint, and trade NFTs on the DIMI blockchain. This is a game-changer for digital collectibles, as it opens up a whole new world of possibilities for creators, collectors, and investors alike.

Uunigate team and our partners Espers Coin team are working on updating Uunigate platform website - https://uunigate.com.
And we would like to thank Espers Coin Team for their contribution and everything they have done for Diminutive Coin.

12.The Future

DIMI coins are subjected to a max supply of just 200K coins to maintain the price and their role in the market. Investing in these coins today will mean an improvement of the price and a constant investment that won't have any negative consequences. DIMI has the potential to become a bright star in the crypto sky, and it is here to stay for a long, long time.

With its limited supply, who knows what the price will be in five years. By looking at the market trends and other factors like demand and supply and inflation, this coin's future is bright, and I can strongly advise it for an investment. Without a doubt, DIMI will have a bright future in upcoming years, and you too can be a part of this amazing crypto success story.

Diminutive Coin Team would like to remind everyone that we have open job positions for community managers and developers. The list of team members will be expanded accordingly and it all depends on your activity in the promotion and work on the project. These positions won't be paid positions, because as we said earlier, this is a community coin and we fund this project ourselves.
